ABOUT ME

Senior Software Engineer with 20+ years in Java and Spring — a career that combines hands-on engineering depth and real team leadership. As an engineer: high-availability systems at ERON (15+ microservices, 10+ LATAM payment providers), and, currently, designing and running TuFactura end-to-end, a production invoicing SaaS for Argentine taxpayers. As a leader: development teams at G&L Group (for Banco Credicoop), Baufest (for BBVA), and Navent, and, alongside family ownership, operations for a family-owned textile company for five years.

EXPERIENCE

Founder & Engineer — Invoicing SaaS for Argentine Taxpayers

Remote

TuFactura

May 2026 – Present

- Designed, built, and shipped a production SaaS end-to-end as the sole engineer — invoicing, recurring billing, tax-authority integration (ARCA), notifications, accountant/affiliate portals — including full data-privacy compliance (export, deletion, audit logging, encryption)
- Run the codebase on a spec-driven workflow: every feature ships with tests, backed by 10+ purpose-built internal tools for code review, DB auditing, compliance checks, and billing diagnostics

Senior Java Backend Engineer — Payments Platform

Remote

ERON International

Apr 2025 – Jun 2026

- Backend engineer across multiple teams within ERON's payments platform — LATAM Payments (twice), Platform, and TuPay Peru — working on card processing (BIN checks, authorization & capture, Multiplo cards), token-based subscriptions, and integrations with LATAM payment providers (CIELO Brazil, WepayU Mexico, Bind Argentina, among others)
- Comfortable operating in complex or undocumented systems: reconstructing flows from logs and tests, and coordinating across teams to ship fixes and new integrations
- Maintained 15+ Java/Spring Boot microservices on Kubernetes, processing deposits and cashouts across multiple LATAM countries

Java Developer

Buenos Aires, Argentina

AstroPay

Feb 2024 – Mar 2025

- Owned end-to-end integration of a new bank as PSP for CVU operations and inter-account transfers in Argentina, from provider API design to production rollout
- Designed the new flow to coexist with the legacy integration during the transition, then led the full migration until the new provider became the sole one

Java Developer

Buenos Aires, Argentina

Banco Industrial SA

Sep 2022 – Jan 2024

- Owned the front-end Sales application and established coding standards across multiple internal projects

Java Developer

Buenos Aires, Argentina

DataArt Inc

Jan 2022 – Aug 2022

- Developed compliance solution plugins integrated into a regulatory reporting system

Senior Java Developer

Buenos Aires, Argentina

Navent

Jun 2021 – Jan 2022

- Led modernization of the real estate backend system (ZonaProp / Inmuebles24), migrating legacy services to Spring Boot microservices

Team Leader & Java Developer

Buenos Aires, Argentina

G&L Group, for Banco Credicoop

Jan 2020 – Jun 2021

- Promoted to Team Lead of the GUV validation system, leading a team of 6 engineers, resolving critical performance bottlenecks and delivering new regulatory requirements on schedule

Team Leader & Java Developer

Buenos Aires, Argentina

Baufest, for BBVA

Jan 2019 – Dec 2019

- Led a BBVA digital transformation project, migrating analog banking processes to REST microservices

Operations Manager

Buenos Aires, Argentina

Textil DaiVak SRL

Jan 2014 – May 2019

- Managed day-to-day operations of a family-owned textile company alongside ownership — purchasing decisions, warehouse, order fulfillment, and daily opening/closing
- Sold directly to key accounts and built out a sales team to grow reach; handled collections and vendor negotiation
- Led operational and systems changes to improve efficiency, managing the business through a growth phase and later a contraction, and sourced new business opportunities

Earlier Experience (2003 – 2013): Team Leader & Java Developer at ProKarma for Hughes Telematics (telematics backend, introduced Scrum practices), BairesDev for PlayPhone (gaming), Verizon Business (phone number management applications), Siemens Itron (intranet/extranet for collections), and Team Leader & Java Developer at IBM (international incentive/compensation systems) and Decidir.com (banking and commercial risk systems, first professional Java experience). Alongside this, ran JM Sistemas (2007 – 2013), an independent freelance practice building custom systems for small and medium businesses.

SKILLS

Skills: Java 17/21, Spring Boot, Spring Data JPA, Hibernate, Kafka, Microservices, REST API design & API gateways · Spring Security, JWT, OAuth2 · Flyway (DB migrations), MySQL, Redshift · Payment gateway integrations (Mercado Pago) · AWS, Kubernetes, Docker, GitHub Actions CI/CD · New Relic, Grafana/Loki · Legacy Java/J2EE (JSP, Servlets) — comfortable maintaining and migrating older codebases · AI-assisted development (Claude Code) · Technical team leadership, operations management, and vendor negotiation

EDUCATION, CERTIFICATIONS & LANGUAGES

Education: Systems Licentiate Degree, CAECE University (2007) · System Analyst, ORT Technological Institute (2001)

Certifications & Languages: DevOps Diploma, UNC (2024) · Certified ScrumMaster (2010) · EF SET English C1 Advanced (2022) · Spanish (Native), English (C1)
