PROFESSIONAL SUMMARY

Senior Software Engineer with **20+ years** in Java and Spring, with a career that combines hands-on engineering depth and real team leadership — not one or the other. As an engineer: high-availability systems at ERON (15+ microservices, 10+ LATAM payment providers, multi-country deposits/cashouts), and independently designed, built, and now runs **TuFactura**, a production invoicing SaaS for Argentine monotributistas, end-to-end — real tax-authority integration, payments, and compliance included. As a leader: led development teams at banks and international companies — G&L Group for Banco Credicoop (Kafka-based validation system), Baufest on a BBVA digital transformation project, Navent (backend modernization) — and, alongside family ownership, managed operations for a family-owned textile company for five years (purchasing, key-account sales, collections, warehouse/logistics). Builds and ships using an agent-assisted, spec-driven workflow with Claude Code. Looking for a long-term backend/Java role — or a technical leadership one — open to remote, hybrid, or on-site.

FEATURED PROJECT — INDEPENDENTLY BUILT & SHIPPED

TuFactura Live in production — May 2026 - Present

Solo Founder & Engineer — Invoicing SaaS for Argentine Monotributistas

- Designed, built, and shipped a full production SaaS (invoicing, recurring billing, AFIP/ARCA integration, notifications, accountant/affiliate portals) as the sole engineer, end-to-end from spec to deploy
- Practiced spec-driven, agent-assisted development throughout: every feature starts as a written spec/plan, implemented and reviewed with Claude Code, backed by tests before merge
- Authored 10+ purpose-built Claude Code skills for this project alone: automated code review, DB querying/auditing, AFIP token invalidation, recurring-billing diagnostics, pricing/limits updates, blog and marketing content generation

`Java 17` `Spring Boot` `React + TypeScript` `MySQL / Flyway` `Spring Security / JWT` `OAuth2` `Mercado Pago` `GitHub Actions CI/CD` `Claude Code` `Spec-Driven Dev` `AFIP/ARCA`

WORK EXPERIENCE

Eron International — internal rotation, including AstroPay

Feb 2024 – Jun 2026

Senior Java Backend Engineer — Payments Platform (Apr 2025 – Jun 2026)

- Backend engineer across multiple teams within ERON's payments platform — LATAM Payments (twice), Platform, and TuPay Peru — working on card processing (BIN checks, authorization & capture, Multiplo cards), token-based subscriptions, and integrations with LATAM payment providers (CIELO Brazil, WepayU Mexico, Bind Argentina, among others)
- Comfortable operating in complex or undocumented systems: reconstructing flows from logs and tests, and coordinating across teams to ship fixes and new integrations
- Maintained 15+ Java/Spring Boot microservices on Kubernetes, processing deposits and cashouts across multiple LATAM countries
- Used Claude Code day-to-day for code review, log correlation across services, and incident investigation

`Java 17` `Spring Boot` `MySQL` `Amazon Redshift` `AWS` `Kubernetes` `Kustomize` `New Relic` `Grafana / Loki` `Claude Code` `Windsurf`

Java Developer — AstroPay (Feb 2024 – Mar 2025)

- Owned end-to-end integration of BIND (Banco Industrial) as the new PSP for CVU operations and inter-account transfers in Argentina — from provider API design to production rollout
- Designed the new CVU flow to coexist with the legacy Banco Coinag integration during the transition period, then led the full migration until BIND became the sole provider

`Java` `Spring Boot` `CVU / COELSA` `AWS` `Jenkins` `Kibana`

Banco Industrial SA

Sep 2022 – Jan 2024

Java Developer

- Owned the front-end Sales application and established coding standards across multiple internal projects

`Java 8` `Spring MVC` `MySQL` `AngularJS` `Docker` `Maven`

DataArt Inc

Jan 2022 – Aug 2022

Java Developer — Contractor

Developed compliance solution plugins integrated into a regulatory reporting system.

`Java 11` `Spring Boot` `Docker` `Gradle` `Elasticsearch`

Navent

Jun 2021 – Jan 2022

Senior Java Developer

Led modernization of the real estate backend system (ZonaProp / Inmuebles24), migrating legacy services to Spring Boot microservices.

`Java 11` `Spring Boot` `Lombok` `Hibernate` `Oracle`

G&L Group for Banco Credicoop — Jan 2020 – Jun 2021

Team Leader & Java Developer

- Promoted to Team Lead of the GUV validation system, leading a team of 6 engineers, resolving critical performance bottlenecks and delivering new regulatory requirements on schedule

Java 8 | Spring Boot | Kafka | Tomcat

Baufest for BBVA — Mar 2019 – Jan 2020

Team Leader & Java Developer

BBVA digital transformation project — migrating analog banking processes to REST microservices.

Java 8 | Spring MVC | REST APIs

Textil DaiVak SRL — Jan 2014 – May 2019

Operations Manager

- Managed day-to-day operations of a family-owned textile company alongside ownership — purchasing decisions, warehouse, order fulfillment, and daily opening/closing
- Sold directly to key accounts and built out a sales team to grow reach; handled collections and vendor negotiation
- Led operational and systems changes to improve efficiency, managing the business through a growth phase and later a contraction, and sourced new business opportunities

Purchasing & Vendor Negotiation | Key Account Sales | Sales Team Building | Warehouse & Logistics

EARLIER EXPERIENCE

ProKarma for Hughes Telematics, Inc — Team Leader & Java Developer 2011–2013

JM Sistemas — Freelance Java Developer 2007–2013

BairesDev for PLAYPHONE — Java Developer 2011

Verizon Business — Java Engineer 2006–2009

Siemens Itron Business Services — Java Engineer 2005–2006

IBM — Team Leader & Java Developer 2003–2006

Decidir.com — Team Leader & Java Developer 1999–2002

TECHNICAL SKILLS

AI-AUGMENTED ENGINEERING

Claude Code | Custom Agents / Skills / Plugins | Spec-Driven Development | Multi-Agent Orchestration

CORE

Java 17/21 | Spring Boot | Spring Data JPA | Hibernate | Lombok | Java Records | REST APIs | Webhooks / IPNs

CLOUD & INFRA

AWS | Secrets Manager | Kustomize | Docker | Jenkins | Kubernetes

DATABASES

MySQL | MongoDB | Amazon Redshift | Elasticsearch

OBSERVABILITY

New Relic | Grafana / Loki | Sentry | Kibana

MESSAGING & ARCH

Kafka | Microservices | Event-Driven | Multi-Gateway Routing

EDUCATION

Systems Licentiate Degree
CAECE University
2007

System Analyst
ORT Technological Institute
2001

Computer Technician
ORT Technical High School
1998
