ABOUT ME

AI-augmented Software Engineer, 20+ years in Java/Spring, who ships production systems on LLM-driven agentic workflows (Claude Code) as a core practice. Founder & Engineer at TuFactura, a live SaaS with paying customers. Backed by real delivery inside customer environments — Baufest (on-site at BBVA), G&L Group (Banco Credicoop), Eron International.

EXPERIENCE

Founder & Engineer — Invoicing SaaS for Argentine Taxpayers *Remote*
TuFactura *May 2026 – Present*

- Run the codebase spec-driven with Claude Code: every feature ships as a spec, implemented and reviewed by 10+ purpose-built internal AI agents (compliance auditing, billing diagnostics, automated code review), with tests
- Direct bridge between customers and engineering — talk to accountants/end users, turn feedback into specs; grew a paying customer base (sub-50 active, 50 more onboarding) via SEO and a referral channel (15% commission), now negotiating a marketplace partnership for distribution

Java Developer / Senior Java Backend Engineer, Payments Platform *Buenos Aires, Argentina / Remote*
Eron International — internal rotation, including AstroPay *Feb 2024 – Jun 2026*

- **AstroPay (Feb 2024 – Mar 2025):** Owned end-to-end integration of a new bank as PSP for CVU operations and inter-account transfers in Argentina, coexisting with the legacy integration until it became the sole provider
- **Payments Platform (Apr 2025 – Jun 2026):** Built "Bau Killer," an AI tool for support to resolve prod tickets directly — cut tickets reaching engineering 60% (100→40) and cut resolution from days to same-day

Java Developer *Buenos Aires, Argentina*
Banco Industrial SA *Sep 2022 – Jan 2024*

- Owned the front-end Sales application, working directly with the bank's business areas as source of requirements; established coding standards across internal projects

Senior Java Developer, Navent (Jun 2021 – Jan 2022) / Contractor, DataArt Inc (Jan 2022 – Aug 2022): Modernized the real estate backend (ZonaProp / Inmuebles24) to Spring Boot microservices; built compliance plugins for a regulatory reporting system.

Team Leader & Java Developer *Buenos Aires, Argentina*
G&L Group, for Banco Credicoop *Jan 2020 – Jun 2021*

- Promoted to Team Lead of the GUV validation system — led 6 engineers under regulatory deadlines, working directly with the bank's business units; cut batch processing time from hours to under 10 minutes

Team Leader & Java Developer *Buenos Aires, Argentina*
Baufest, for BBVA *Mar 2019 – Jan 2020*

- On-site at BBVA, added a case-management API replacing paper workflows on a mainframe-backed web app, then migrated it to REST microservices and industrialized it back at Baufest

Operations Manager, Textil DaiVak SRL (Jan 2014 – May 2019): Ran daily operations alongside ownership, led a sales team, and managed customer/vendor relationships through growth and contraction.

Earlier Experience (2003 – 2013): Team Manager at ProKarma (shared delivery with a US-based dev cell); Team Leader & Java Developer at BairesDev, Verizon, Siemens Itron, IBM, Decidir.com; also freelance via JM Sistemas.

SKILLS & EDUCATION

Skills: AI/LLM engineering: Claude Code, agentic workflows, prompt engineering · Java 17/21, Spring Boot, Kafka, Microservices · Spring Security, JWT/OAuth2 · MySQL · AWS, Kubernetes, Docker
Education & Certifications: Systems Licentiate, CAECE · DevOps Diploma, UNC · CSM · EF SET C1 · Spanish (Native), English (C1)
Community Leadership: Lead events for 200+ people as MC/facilitator; coordinate youth groups and international trips.
